

What we need from you, to go live

ما نحتاجه منكم لبدء التشغيل

At a glance — four things, and two of them have deadlines

#	What	Who answers	Deadline	Why it cannot wait
1	Tax registration number, legal name, billing email	Accountant	Before the first invoice	Until it is set, no invoice can call itself a Tax Invoice, and your tenants cannot reclaim the VAT they pay you
2	Your Egyptian chart of accounts	Accountant	Before opening balances	Everything else in the books hangs off it
3	Opening balances + the cut-over date	Accountant	Before the first month closes	Without them the first trial balance is wrong by exactly the history that preceded it
4	Two conventions: document numbering, fiscal-year start	Accountant	Before the first invoice / before anything is posted	Neither can be undone cleanly. See Part 4

١ • الرقم الضريبي والاسم القانوني وبيد الفوترة — قبل أول فاتورة • ٢ • دليل الحسابات المصري • ٣ • الأرصدة الافتتاحية وتاريخ التحول • ٤ • قرارات لا رجعة فيهما: ترقيم المستندات وبداية السنة المالية.

Part 1 • Your tax identity

أولاً • الهوية الضريبية

This is the single highest-consequence item on the page, and it is one screen.

Three values. They print on every invoice a tenant receives and files with their own accountant.

Field	الحقل	Your answer
Tax registration number (TRN)	الرقم الضريبي	
Registered legal name (exactly as on the tax card)	الاسم القانوني المسجل كما في البطاقة الضريبية	
Billing-enquiries email	بريد استفسارات الفوترة	

What happens while these are blank — and it is deliberate, not a bug.

- The invoice is titled plainly **Invoice** / **فاتورة**, never Tax Invoice / فاتورة ضريبية. A document that calls itself a tax invoice must carry a registration number or the tenant cannot claim the input VAT. We would rather issue an **incomplete** document than a **confidently wrong** one — a plausible-looking placeholder TRN gets filed by the tenant and fails on their audit.
- The seller name falls back to **"Atriom"**, which is the software's name and appears on nobody's lease.
- The system reports this to us as **blocking** on every pre-deploy check, so it cannot be forgotten.

Part 2 · Your chart of accounts

ثانيًا · دليل الحسابات

Send it as a **CSV or Excel file, one account per row**. The system imports it directly — there is nothing to type in by hand, and re-sending a corrected file **updates** the accounts rather than duplicating them (they are matched on the code).

The columns

Column	العمود	Required	What it accepts
code	كود الحساب	Yes	Digits only. Any width — see below
name_en	اسم الحساب بالإنجليزية	Yes	Free text
name_ar	اسم الحساب بالعربية	Yes	Free text
type	نوع الحساب	Yes	asset · liability · equity · revenue · expense
cash_flow_section	قسم التدفق النقدي	Optional	cash · operating · investing · financing
is_postable	قابل للترحيل	Optional	1 or 0 — is this a posting account, or a heading you only total?
is_active	نشط	Optional	1 or 0

Three things that are NOT columns, on purpose:

- **The parent account.** It is derived from the code — 1110 is the parent of 11101. A column for it would let a file state a hierarchy the system disagrees with, and then two answers exist for one question. **Row order does not matter**; parents may come after children.
- **Debit or credit normal balance.** Derived from type. A file could otherwise assert that an asset is credit-normal, and the system would quietly disagree with it for ever.
- Revenue and expense accounts **may not carry a cash-flow section** — they net into net income by type, and letting one move to investing breaks the statement's arithmetic.

One convention that is yours, not ours

Account code width — 8 digits or 10? The system is width-agnostic, so this is your house convention. Tell us which you use and send the file that way; we will not renumber it.

Part 3 · Opening balances and the cut-over date

ثالثًا · الأرصدة الافتتاحية وتاريخ التحويل

The cut-over date is the day the new system becomes the book of record. Everything before it is history you carry in as one opening position; everything after it is transacted here.

Your answer	
Cut-over date	تاريخ التحويل

Then the balances **as at the day before that date**:

Balance	الرصيد	What we need
Accounts receivable	الذمم المدينة	Per tenant, per invoice if you have it — an aged list is ideal
Accounts payable	الذمم الدائنة	Per supplier
Bank and cash	البنك والنقدية	Per account, matching your chart
Security deposits held	التأمينات المحتجزة	Per tenant — this is money you owe back, not income
Fixed assets	الأصول الثابتة	Cost, accumulated depreciation, and the date each was put into service

How it is loaded. A screen takes the trial balance and creates a **draft** journal entry your accountant reviews and posts. Nothing reaches the books until they do — so a wrong file is a correction, not a disaster: **loading a corrected file a second time produces a second draft beside the first**, which you can compare and delete. Only posting commits anything.

You do not have to wait for the fiscal year to be opened. A draft can be prepared before the period exists and posted afterwards, so Part 3 and Part 4b can be answered in either order.

What happens without them. The first trial balance is wrong by exactly the history preceding it: the ledger balances, but it describes a business that started on the cut-over date with nothing.

Part 4 • Two decisions that cannot be undone

رابعًا • قراران لا رجعة فيهما

Both are free to make now and expensive to change later. **Please answer both before the first invoice is issued.**

4a • Document numbering • ترقيم المستندات

Every document carries a prefix and a running number. Two questions:

(i) Do the default prefixes suit you, or do you use your own?

Document	المستند	Default	Yours, if different
Tax invoice	فاتورة ضريبية	INV	
Credit note	إشعار خصم	CN	
Payment receipt	إيصال سداد	RCT	
Journal entry	قيد يومية	JE	
Supplier bill	فاتورة مورد	BILL	
Expense	مصرف	EXP	
Security deposit movement	حركة تأمين	DEP	
Payroll run	مستّر رواتب	PAY	
Lease	عقد إيجار	LSE	
Post-dated cheque	شيك آجل	PDC	
Purchase request	طلب شراء	PR	

(ii) When does the number reset?

#	Question	السؤال	Your answer
A9.1 / A9.2	Sign off the posting map — do all 52 roles point at the right account in your chart? And is the 5% marketing levy revenue, or a restricted fund?	اعتماد خريطة الترحيل · ورسم التسويق 0%: إيراد أم صندوق مخصص؟	
A2.7	Are invoices issued under Eltizam's TRN, or each owner's?	هل تصدر الفواتير برقم التزام الضريبي أم برقم كل مالك؟	
A8.3	What history migrates, how many years, and can you send sample files?	ما التاريخ الذي سيُرَجَّل، وكم سنة، وهل يمكن إرسال عينات؟	
B.1 / B.3-B.5	How is Eltizam paid, and whose bank account does tenant money land in? Fixed fee, % of collected, or % of gross? Rent only, or all income?	كيف تُحتسب أتعاب التزام، وفي أي حساب بنكي يدخل مال المستأجرين؟	
C-PAY	The statutory payroll rates — salary tax and both social-insurance shares.	النسب القانونية للأجور: ضريبة المرتبات وحصتا التأمينات.	
C4.2	Target go-live date, parallel-run period, and who validates the migrated data on your side.	تاريخ بدء التشغيل، ومدة التشغيل المتوازي، ومن يعتمد البيانات المرحّلة لديكم.	

Part 6 · Confirm a default — silence ships it

سادسًا · تأكيد الإعدادات الافتراضية — الصمت يعني الموافقة

You do not need to reply to this section. Everything below is already built and will ship exactly as described. Read it, and tell us only about the lines you want **changed**. Each is a setting, not a rebuild.

#	Ships as	✓ or change
A1.2-A1.6	Percentage rent, CAM true-up, late fees and the marketing levy are VAT-exempt ; levy is 5% of base rent only	
A1.7	Late fee 2% of outstanding · minimum 50 EGP · 7-day grace · charged once · no cap	
A1.8	Security deposit 3 months · escalation 7% fixed (a CPI-indexed option exists)	
A1.9	Percentage rent on an artificial breakpoint : (sales – threshold) × rate	
A1.10	Payment terms 7 days from issue	
A3.2	Accrual, revenue recognised at issue. Straight-line rent (EAS 49) is built and off	
A3.4	A closed period blocks back-dated posting	
A3.8	Reporting per property. Consolidated is NOT reachable today — the books support it; the screens do not	
A5.2	Payroll withholdings split into their own payable accounts	
A6.1	Egyptian tax depreciation 5 / 10 / 25 / 50% (Law 91/2005 art. 25)	
A6.2 / A9.6	Monthly depreciation run · bilingual payslips · per-asset useful life and salvage	
A7.2 / A7.5	Deposit is a refundable liability with no VAT ; discounts go through credit notes with approval	
A9.3 / A9.4	CAM presented gross ; inventory at per-movement unit cost (FIFO on receipts)	
A8.1 / A8.2	23 report pages · CSV + XLSX · saved views · scheduled email	
B.2 / B.9	Co-owners with % and dates; the owner has oversight and requests, and approves nothing before Eltizam acts	

#	Ships as	✓ or change
B2.3–B2.5	Unit-owner صيانة is property revenue; no operator approval on a resale	
C1.1	Unit types: retail · F&B · wellness · service · kiosk · office · storage	
C1.2–C1.6	Renewal · escalation · early termination · full fit-out grace (rent, service, CAM and levy all suppressed) · manual sales declarations	
C2.1 / C2.2	CAM pool contents and annual true-up; utilities at cost , no markup, no cap	
C2.3	The SLA hour targets the breach scan alerts on	
C2.6 / C3.5 / C3.9	Approval bands 1,000 / 10,000 EGP ; delete is super-admin only and money records are never deletable	
C3.3 / C3.4	Warehouse categories are free text; one reorder level and quantity per item	
D.4	Daily backups, weekly restore drill; a leaver is deactivated , never deleted	
E.3	"Admin (per mall) — full access" does not include deleting records	

Part 7 · Do you need this? — yes means new work

سابعًا · هل تحتاجون هذا؟ — نعم تعني عملاً جديدًا

None of these blocks go-live. Each is a real feature we have deliberately not built, because building the wrong one is worse than building none. Answer **yes** or **no** — a yes becomes scheduled work with an estimate.

#	Question	السؤال	Yes / No
A2.6	Tax-exempt tenants — free zone, government, NGO, embassy? Today taxability is one answer for the whole portfolio	مستأجرون معفون من الضريبة؟	
A2.1	Do tenants withhold tax from your rent and issue certificates you must track? (The supplier side is built; the tenant side is not — a tenant who withholds looks like an underpayment for ever)	هل يخصم المستأجرون ضريبة من الإيجار ويصدرون شهادات؟	
A3.3 / A7.3	Should rent billed in advance be deferred and recognised over the period?	هل يُؤجَّل الإيجار المحضَّل مقدمًا ويُعترف به على مدى الفترة؟	
A7.1	Should security cheques be their own class , separate from payment cheques?	هل تُصنَّف شيكات الضمان تصنيفًا مستقلًا؟	
A9.5	Accrue a leave provision monthly?	هل يُحتسب مخصص إجازات شهريًا؟	
A9.8	A salary-tax return , beside the VAT return and Form 41?	إقرار ضريبة مرتبات؟	
C1.8	Generate the lease contract as a PDF , with signature tracked in-system? (Uploading a signed lease already works)	إصدار عقد الإيجار من النظام مع تتبع التوقيع؟	
C2.5	Recharge a tenant-caused repair to that tenant? If yes: VATable or cost recovery? Parts only, or parts + labour + the vendor's invoice?	إعادة تحميل الإصلاح على المستأجر المتسبب؟	
C2.7	Must a vendor bill back an externally-bought part before the job can close?	هل يجب فوترة القطع المشتراة خارجيًا قبل إغلاق أمر العمل؟	
C3.2	Inter-mall stock transfers as ONE action? (Same-property transfers already work. Cross-property is refused by design, because value would cross the property boundary with no journal entry — the documented path is adjust-out then receive-in)	تحويل مخزون بين المولات كإجراء واحد؟	

#	Question	السؤال	Yes / No
C3.6	More than one approver for a large spend? Today it is a single-level band per module	أكثر من معتمد للمصروفات الكبيرة؟	
C3.8	Per service: billed out or absorbed as a unit expense — plus an annual report either way	لكل خدمة: تُفوتر أم تُحمّل كمصروف؟	
D.2	Paymob card payments — activate now or later? (Built and switched off; sandbox certified)	مدفوعات البطاقات عبر Paymob: الآن أم لاحقًا؟	
C4.3	Training format, and which roles?	شكل التدريب وأي الوظائف؟	

Part 8 · Two sentences we cannot build from

ثامناً · جملتان لم نستطع البناء عليهما

Each needs **one clarifying sentence** — we stopped rather than guess.

#	The wording	Why we stopped	Your answer
E.1	FR-REQ-01, "delegation (from/to)"	No such concept exists anywhere else in the system or in the rest of the requirements	
E.2	FR-PPM-01, "Fixed maintenance"	The requirements say both one-time and periodic, in different sentences. We built periodic	

How to return this

Any way that suits you — reply in the table, mark up a printed copy, or send the answers in a message. **Parts 1-4 first**; the rest can follow. Part 6 needs nothing unless you want a line changed.
